Climbing Areas of Donner Summit

For this project, I created a map of the rock climbing areas of the Donner Summit area near Truckee, CA. There a quite a few crags of quality granite and it is a popular area for both locals and people from other areas. Some rock climbing guidebooks just include a hand-drawn map of the area, so I created a useful and accurate representation of the area. The purpose of this project was to clearly map out the climbing areas, where to park, and how to get to them. I also wanted to show how many climbing routes were at each area to give a better sense of how much climbing is available at each crag. I created and digitized data for climbing areas (points), access trails (lines), and parking areas (points).
